HRLocker Professional**

About HRLocker

HRLocker is a cloud-based people, recruitment & performance management system. It enables organisations to automate their people management & recruitment processes, streamlining HR requirements all in one place.

HRLocker was started by Adam Coleman in 2013. Adams background began in recruitment and then moved to HR in 1996.

Within the last 7 years, the platform has developed and grown into one of the best HR product suites on the market today. HRLocker is a HR Management system with powerful features that enables companies to manage their people process.

The company has grown 40% year on year.

Our sweet spot customers are between 5 – 1000+ employees. HRLocker has over 35,000 users in over 55 countries.
